

Creating Pond Food Webs

Create a Pond Food Web using the information given below.
Draw pictures to make your food web more interesting.

Pond Weed is eaten by:

Lesser Water Boatman, Ramshorn snail, Caddis fly larva, Mayfly nymph, Rudd

Detritus is eaten by:

Water flea, Lesser Water Boatman, Ramshorn snail, Mayfly nymph, Caddis fly larva

Algae is eaten by:

Ramshorn snail, Water flea, Caddis fly larva, Newt tadpole, Rudd

Water Flea is eaten by:

Great Diving Beetle, Greater Water Boatman, Damselfly nymph, Leech, Newt tadpole, Newt

Ramshorn Snail is eaten by:

Great Diving Beetle, Leech, Newt

Lesser Water Boatman is eaten by:

Newt tadpole, Damselfly nymph, Great Diving Beetle, Water mite

Leech is eaten by:

Water mite

Mayfly Nymph is eaten by:

Greater Water Boatman, Damselfly nymph, Dragonfly nymph, Great Diving Beetle, Water mite, Newt

Caddis Fly Larva is eaten by:

Great Diving Beetle, Leech, Great Water Boatman, Newt

Newt Tadpole is eaten by:

Greater Water Boatman, Great Diving Beetle, Leech

Greater Water Boatman is eaten by:

Great Diving Beetle, Damselfly nymph, Leech, Water mite

Damselfly Nymph is eaten by:

Great Diving Beetle, Water mite, Newt

Great Diving Beetle is eaten by:

Water mite

Dragonfly Nymph is eaten by:

Great Diving Beetle, Leech, Water mite

Pond Food Chains

Look carefully at the food chains below which show the feeding habits and relationships of animals which live in fresh water. Create a food web that uses some or all of these food chains.
